Education

VIT Bhopal University Bhopal, MP

B.Tech. in Computer Science Engineering (Cloud Computing and Automation); CGPA: 8.86 *Sep 2022 – Present*

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOPs, Computer Networks

Shri Bal Vinay Mandir Indore, MP

Class XII (CBSE); Percentage: 92% *Jul 2022*

Technical Skills

Languages: Java, SQL
Web & Frameworks: Spring Boot, Hibernate, JPA REST API
Databases: PostgreSQL, MySQL, Redis, Supabase
Cloud & Tools: AWS, Google Cloud, Docker, Git, Postman, Linux, Maven

Projects

AI-Powered Resume Screening System | *Java, Spring Boot, PostgreSQL, Redis, AWS S3* *Jan 2026 – Present*

- Developed a scalable RESTful API using **Spring Boot 3.0** and **Java 21** to automate candidate screening, reducing manual review time by 80%.
- Integrated **Meta's Llama-3 model** for semantic analysis of resumes, achieving 90% accuracy in matching candidates to job descriptions vs. traditional keyword matching.
- Implemented **Redis Caching** to lower API latency to <200ms and utilized **PostgreSQL** with optimized indexing for retrieving applicant data.
- Secured the application using **Spring Security** (JWT) and deployed the service on Render.
- Engineered a secure document storage service using **AWS S3** to handle resume uploads and implemented **API Rate Limiting** to prevent abuse and ensure system reliability.

PrepTrack | *Next.js, Node.js, Supabase, OpenAI API* *Aug 2025 – Oct 2025*

- Architected Next.js frontend with server components to reduce client bundle and improve TTFB by 40%, resulting in faster page loads and smoother user experience.
- Integrated **Supabase** for authentication and **real-time storage**, enabling consistent user sessions and handling 1k+ user sessions during tests.
- Built AI based feedback using **LLM inference** to auto-evaluate interviews and generate structured reports in **under 5s**.
- Added Daily.co **WebRTC** for live video interviews, ensuring seamless performance and supporting 100+ concurrent interview sessions.

DoConvo | *Next.js, TypeScript, OpenAI API, AWS* *Feb 2024 – May 2024*

- Engineered a comprehensive chat application with **PDF integration** and handled security using **AES-256 encryption** to prevent any data breaches.
- Implemented **WebSocket** powered real-time messaging, reducing message delivery time by 35% in internal testing.
- Integrated **OpenAI model** for summaries and chat responses, improving task completion time by 2x.
- Designed a responsive UI using **Tailwind CSS**, achieving 95% Lighthouse scores in performance and accessibility.
- Deployed scalable infrastructure using **AWS EC2** and **S3**, supporting 500+ concurrent users in load testing.

Certifications

AWS Academy Graduate - AWS Academy Cloud Architecting *Apr 2025*
Object Oriented Programming in Java - Coursera *Jun 2025*
Fundamentals of Cloud Computing - Coursera *Jun 2025*
