PROJECTS

PrepTrack | React.js, Node.js, Express, MongoDB, OpenAI API

Aug 2025 – Oct 2025

- Architected Next.js frontend with server components to reduce client bundle and improve TTFB by 40%, resulting in faster page loads and smoother user experience.
- Integrated Supabase for authentication and real-time storage, enabling consistent user sessions and handling 1k+ user sessions during tests.
- Built AI feedback using LLM inference to auto-evaluate interviews and generate structured reports in under 5s.
- Added Daily.co WebRTC for live video interviews, ensuring seamless performance and supporting 100+ concurrent interview sessions.

DoConvo | Next.js, TypeScript, Tailwind CSS, OpenAI API, AWS

Feb 2024 – May 2024

- Engineered a secure document chat platform with AES-256 encryption; handled 100+ files with zero data breaches.
- Implemented WebSocket-powered real-time messaging, reducing message delivery time by 35% in internal testing.
- Integrated OpenAI model for summaries and chat responses, improving task completion time by 2× for 80% of users.
- Designed a responsive UI using Tailwind CSS, achieving 95% Lighthouse scores in performance and accessibility.
- Deployed scalable infrastructure using AWS EC2 and S3, supporting 500+ concurrent users in load testing.

Blood Bank Management System | AWS EC2, RDS, MySQL, PHP

Aug 2023 – Oct 2023

- Developed a cloud-based blood bank platform that can manage 500+ donor records with full CRUD functionality.
- Optimized MySQL operations via AWS RDS, reducing query latency by 40% and maintaining 99.9% uptime.
- Streamlined UI workflows using HTML, CSS, and JS, improving form submission accuracy by 30% during trials.
- Reduced hosting costs by 30% using EC2 reserved instances and auto-scaling strategies.
